PROFESSIONAL SUMMARY

Computer Science & Engineering student (AI & ML) at VIT Bhopal with hands-on expertise in Deep Learning, Computer Vision, Reinforcement Learning, Cloud Architecture (AWS), and RAG pipelines. Proven track record building scalable ML inference systems, backend APIs with FastAPI, and cloud-native AWS environments. Hackathon award winner with internship and open-source project experience.

TECHNICAL SKILLS

Core AI/ML: Python, scikit-learn, PyTorch, Deep Learning (ANN), Reinforcement Learning, Computer Vision, NLP, Prompt Engineering

GenAI & RAG: LangChain, LangGraph, RAG Pipelines, Vector Databases, Embeddings, Text Splitters, Chunking Mechanisms

Cloud & DevOps: AWS (SageMaker, EC2, S3, Lambda, VPC, RDS, IAM), Firebase, FastAPI, Cloud Pipelines

Frontend: Next.js, React, TypeScript, HTML5, CSS3

Foundations: DSA, SDLC, SQL, Data Mining, GitHub Copilot, Cursor AI, Android Studio

EXPERIENCE

UI Design & Frontend Contributor | Nifty Invest

Jul 2025 – Aug 2025 · Remote

- Crafted clean, pixel-perfect UI layouts for a SaaS-based CRM onboarding dashboard, ensuring visual consistency and smooth user flows across key interface screens.
- Contributed to the design and frontend presentation layer of a companion mobile application for the same CRM platform, aligning UI components with the product's design language.
- Performed structured UI cleanup and layout maintenance—eliminating visual clutter, standardising spacing, and improving overall interface polish.

PROJECTS

AWS Cloud-Native ML Inference & Predictive Analytics Platform | SageMaker, FastAPI, EC2, S3, Lambda, VPC

- Architected a secure multi-tier AWS environment with isolated VPC subnets, routing tables, and internet gateways; provisioned SageMaker endpoints at 98.5% uptime.
- Built backend routers using FastAPI on AWS EC2 (Ubuntu) to reverse-proxy application-layer traffic; configured CORS middleware and asynchronous background processing.
- Automated data handlers via Lambda and S3 event triggers, saving 14+ manual hours/month; structured artifact storage pipelines for end-to-end ML model deployment.

Agentic AI RAG Platform for Document Intelligence (In Progress) | LangChain, LangGraph, Python, Vector DB

- Engineering a production-grade RAG pipeline using LangChain to parse, chunk (recursive text splitters), and embed textual datasets into a vector store for semantic retrieval.
- Building a multi-agent routing workflow via LangGraph to evaluate query intent, synthesise context-retrieved answers, and handle tool-calling orchestration across document sources.

Financial Fraud Detection System | Python, scikit-learn, React

- Implemented ML classification on highly skewed financial datasets; reduced false-positive flags by 22%, achieving 94.6% F1-score using ensemble techniques and SMOTE resampling.

PrepTraQ: AI-Driven Voice Interview Platform | Team of 6 | Next.js, Firebase, Gemini API

- College team project (6 members)—solely responsible for database architecture and Firestore optimisation; designed schema with denormalised collections, efficient indexing, and batched writes achieving 95% data accuracy.
- Applied Firestore query optimisation (compound indexes, pagination cursors) to reduce read costs and decrease workflow navigation latency by 40%.

EDUCATION

VIT Bhopal University

Aug 2023 – May 2027 (Expected) · Bhopal, MP

B.Tech in Computer Science & Engineering (AI & ML)

CGPA: 8.31 / 10.00

MTMHSS

2020 – 2023 · Kanpur, UP

Class 12 ISC: 77% | Class 10 ICSE: 88.5%

CERTIFICATIONS & ACHIEVEMENTS

Certifications & Courses

AWS Certification – IntelliPaat Academy (Sep 2025)
AWS CCP CLF-C02 Practice Set (Sep 2025)
Applied ML – Univ. of Michigan (Coursera)
NPTEL Cloud Computing (68%) | NPTEL IoT (86%)

Leadership

Core Member, Design Team
SDC, VIT Bhopal
Jan – Aug 2025

Awards

1st – Linpack Hackathon
Algorithm Visualiser
2nd – IEEE Hackathon
AI Weather + LLM
